You'll notice, of course, the addition of two new categories to the playlist, METAL and NEW AGE/EXPERIMENTAL. This to keep up with our diversifying programming. Some of the records in these two categories didn't really fit into our regular categories, so they weren't always showing up on the playlist, even though they were getting airplay. We hope this will make it easier for you as a label to locate those records of particular interest on our list. Thank you for your continued support.
